PROFESSIONAL SUMMARY

Innovative Software Engineer with 5 years of experience building and maintaining applications. Proficient in HTML, CSS, JavaScript (ReactJS) with modern libraries and frameworks. Passionate about usability and capable of working with a variety of technologies.

SKILLS

- HTML5, CSS and JavaScript (ReactJS and VueJS framework) with build tools such as webpack and npm.
- Redux for state management and AJAX and Axios for API calls.
- Experience with Test-Driven Development using automated test framework such as Jest and Enzymes.
- Bootstrap, CSS, SCSS, SASS for styling.
- NodeJS (Express.js), PHP and PHP framework (Laravel).
- Mobile development with React Native.
- Database: MySQL, PostgreSQL, MongoDB.
- Basic knowledge of Java (SpringBoot framework).
- Knowledge of Selenium and Cypress for UI automated testing.
- Version control with Git and Continuous Integration/Continuous Deployment with Jenkins.

WORK EXPERIENCE

Software Engineer

July 2019 – Present

Interswitch Group

- Implement web design and development principles to build admin portal for a mobile agent (Quickteller Paypoint) using ReactJS, Axios, React Router and self-customized React Table
- Bringing mock-ups to life using HTML, CSS, JavaScript (ReactJS).
- Development of a mobile agent application (Quickteller Paypoint) for making transactions such as fund transfer, airtime, bills payment using ReactJS, Axios, React Router, React Table, and integration to Interswitch payment gateway (Quickteller and Webpay).
- Development of a mobile application for Quickteller Paypoint using React Native, Axios for API calls and integration to Interswitch payment gateway (Quickteller and Webpay).
- Deployment to staging using Jenkins.
- Coordinates the design and implementation of Quickteller Paypoint, including collaboration with project managers, client representative and development teams.

Software Developer

August 2017 – July 2019

Concept Nova

- Worked in a team of two to develop a Customer Relationship Management (CRM) application using ReactJS for UI and PHP Laravel for the backend.
- Developed a credit portal using ReactJS for UI
- Worked as a fullstack developer to develop a Delivery Management System (DMS) using PHP(Laravel Framework) and NodeJS.
- Developed frontend interface for an asset disposal application using PHP (Laravel) and maintained an asset disposal application for the organization
- Developed, upgraded, and maintained a loan risk application for a financial industry.
- Coordinated the design and implementation of various applications, including collaboration with project managers, client representative and development teams.
- Projects upload to a staging/testing server and issuing of requisition on behalf of my team.

Software Developer Intern

November 2015 – June 2016

Webometrics Unit, OAU

- Worked with the backend team to develop a voting platform for students on OAU campus.
- Served as scrum master during the internship period.
- Collaborated with other team members to determine the best design specification and details.

PROJECTS

-
- **Brigade Congress Campaign App**- ReactJS application to automate political party members registration, dues, and activities.
 - **GiftPadi**- ReactJS application that help vendors make bookings for event souvenirs.
 - **Student Management System** – Built a system to manage student’s activities and grades in secondary school using PHP Laravel framework, JQuery and SQL.
 - **Rayzorpay Backend Service** – Built a microservice with NodeJS, that acts as an intermediary between Razorpay gateway service and client service.

EDUCATION

Bachelor of Science in Computer Science with Mathematics (CGPA: 4.27/5) **2013- 2017**

Obafemi Awolowo University, Ile Ife.

National Diploma in Computer Science (CGPA: 3.78/4)

2009-2011

Lagos State Polytechnic.
